

Protect your Shoreline Naturally with a **FREE Shoreline Makeover**

Christie Lake property owners are invited to participate in the *Love Your Lake Fish Habitat Enhancement Program*. For a limited time, eligible shoreline landowners can receive a shoreline naturalization makeover completely free of charge.

What's Included:

- Confidential site visit with shoreline specialist
- Custom planting plan using native plants
- Purchase and installation of new plants

Why?

Natural shorelines rich in native vegetation benefit us all by improving water quality through nutrient and contaminant uptake (which can cause excessive weed and algae growth) and protecting shorelines from erosion. Local fish and wildlife also benefits from the improved shoreline as it provides food, shelter and safe travel corridors!
